KTTD NEWS BULLETIN

KTTD Met with Industry Stakeholders at the Logitrans Türkiye Fair

11-13 November 2026 · Istanbul · Logitrans Türkiye Fair

The Chemical Transport Vehicle Cleaners Association (KTTD) visited the Logitrans Türkiye Fair, held in Istanbul on 11-13 November 2026, and met with key industry stakeholders. Throughout the fair, the Association's Secretary General visited the stands of companies, institutions and organizations close to chemical and liquid cargo transport.

Board of Directors at the KTTD Stand

KTTD Chair of the Board Ali Naci Şahin and Vice Chair of the Board Kerem Zihni Gürler were present at the KTTD stand on the first day of the fair and met with industry representatives. This close presence of the management at the stand made a significant contribution to the association's visibility in the sector and to its corporate relationships. We would like to thank our Chair Ali Naci Şahin and our Vice Chair Kerem Zihni Gürler for their contributions.

10th Participation and Plaque

As KTTD, we took part in the 19th International logitrans Transport Logistics Fair for the 10th time. The plaque prepared on the occasion of our tenth participation was presented to KTTD Secretary General Çağla Sinem Özgen Alemdar by Şekib Avdagiç, Chairman of the Board of the Istanbul Chamber of Commerce (ITO). We thank all the stakeholders who contributed, first and foremost the Eko MMI team that organized the event.

Meetings with Universities

As part of the fair, meetings were also held with university representatives in order to support students' academic development through training sessions and field visits. Ideas were exchanged on organizing joint training programs with students representing Istanbul Bilgi University, Istanbul Kent University, and the Logistics Clubs of Istanbul University, Istanbul Ticaret University and Piri Reis University. KTTD aims to bring industry knowledge together with the younger generation and to contribute to the development of qualified human resources in logistics and chemical transport.

Press and Media

During the fair, meetings were also held with trade press and media organizations. Representatives of Ekonomi Medya, Dünya Gazetesi and Hizmetix Dergisi, which also took part in the fair as an exhibitor, met with KTTD and exchanged ideas on preparing news coverage of KTTD's field of activity. KTTD aims to raise awareness of the cleaning and safety of chemical transport vehicles and to bring the association's work to a wider audience.

Stand Visits and Industry Meetings

During the fair, the KTTD Secretary General visited the stands of several companies and organizations close to chemical and liquid cargo transport. Meetings were held with representatives of VTG Nakliyat Lojistik Kiralama, which operates in the field of tank wagons and tank containers, the trailer manufacturer Tırsan, Shell & Turcas Petrol and Petrol Ofisi. On the civil society side of the sector, meetings were held with representatives of UND (International Transporters Association) and LİKİTDER.

During the fair, the KTTD stand was visited by representatives of a number of companies and organizations from different areas of the sector. Officials of Shell, Opet, CVS Yakıt Koruma Sistemleri, FMC Group Danışmanlık, Barlas Lojistik, Hollanda Türkiye Ticaret Derneği, Sare Promosyon, DenizBank, Betainvest Mühendislik, Elitwood Limited Liability Company, Leading International Trades, Growex World Logistics, Easy Lojistik and Unit Load visited the KTTD stand and exchanged information. Representatives of Dünya Gazetesi and Ekonomi Medya also visited the KTTD stand and learned about the association's activities. News coverage and similar collaborations were discussed during the meetings.

ASSESSMENT

Participation in the fair provided a productive meeting ground for introducing KTTD's field of activity and its work on the cleaning, safety and sustainability of chemical transport vehicles to industry stakeholders.

Through these visits, KTTD gained the opportunity to directly introduce its activities in the cleaning, safety and sustainability of chemical transport vehicles, as well as the association's corporate identity, to industry stakeholders.
